

Breeze™

Complex Compound Glass Bending

Breeze™ Complex Compound Glass, a new addition to the product line by Standard Bent Glass Corp, features curved glass panels with compound bends and unlimited creations for the imagination.

With proprietary technology, Standard Bent Glass creates custom molds and can transform a three-dimensional digital computer image into curved glass with complex compound geometrics. Furnished as a laminated safety glass using polyvinyl butyral (pvb), urethane and liquid resin interlayers for material bonding, Breeze™ is available in an unlimited range of:

- Colors
- Patterns
- Textures
- Photographic images

Breeze™ re-shapes architectural possibilities and is available in interior and exterior applications, as well as freestanding works of glass art.
