

SentryGlas® Expressions™ Decorative Interlayer

SentryGlas® Expressions™, a new addition to the wide range of custom architectural glass products by Standard Bent Glass Corp, is a computer-based digital imaging system for decorative glass utilizing DuPont™ technology, which enables virtually any icon or picture to be vibrantly reproduced in laminated safety glass. Imaging available includes colors, patterns, textures, rice papers, gradient tones and photographs.

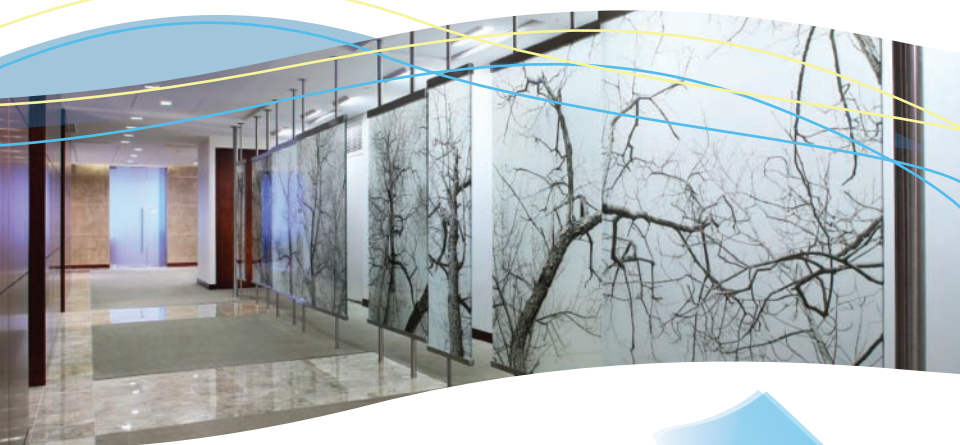

Standard Bent Glass can fit any custom architectural need. Stylish and innovative, with photo-accurate imaging, SentryGlas® Expressions™ is perfect for decorative walls, office floors and balustrades and railings. Available glass options include:

- **Curved**
- **Bullet resistant**
- **Blast-resistant laminated**
- **Insulated**

Standard Bent Glass is one of three companies in North America that have the manufacturing capabilities for a new imaging concept that combines proprietary inks with glass laminating to produce eye-appealing decorative products for the architectural and automotive markets. SentryGlas® Expressions™ is cost effective, has been fully tested for both interior and exterior applications and meets safety glazing codes.
