

Transparent Armor®

Transparent Armor®, a product by Standard Bent Glass Corp and Global Security Glazing, combines glass and polycarbonates with proprietary technology to produce high-performance windshields and glazing for military vehicles worldwide. The security product meets specific standards and threat levels that are required for attack, ballistic and blast resistance.

Incorporating rock strike and DLC scratch-resistant glazing with heated windshield technology, Transparent Armor® has been used in more than 130,000 windows and doors functioning in the Iraqi theatre. The product has been furnished for HMMWV and MRAP vehicles, as well as RG-31 and RG-33 variances of MRAP.

The firm's unique Single Responsibility Program® ensures that one company has handled all phases of production with total manufacturing accountability.

Global Security Glazing is a jointly owned company with Standard Bent Glass, one of the world's foremost experts in the custom fabrication of glass. For more information on Standard Bent Glass, please visit www.standardbent.com.
